Profile

Venezuelan Systems Engineer with over 10 years of experience in IT, specializing in network and server administration, and focused on web development since 2022. Experienced in frontend development with React and backend development with Node.js and PHP, as well as database design and integration. I combine infrastructure and software development expertise to build efficient, scalable technology solutions that address business needs. Committed to continuous learning, problem-solving, and ongoing improvement.

Experience

Freelance (ajedev.com)

Head of Networks, VIT
(Venezuelan Technological Industries) --- Now

Maintenance of network infrastructure, configuration of switches, routers, and servers, management of services (private cloud, institutional email, databases, web hosting), and implementation of DevOps practices for deployment and automation.

Technology Consultant – *Globalsi SPA, Chile* --- Now

- Provided comprehensive IT consulting, including network and server administration.
- Designed and developed custom web applications to support business operations.
- Offered technical advisory services to optimize infrastructure and digital processes.
- Implemented integrated solutions combining networking, cloud, and software development.

Education

Systems Engineer, Polytechnic University Institute Santiago Mariño
January 2012 – January 2016
